

# NANO COATED?

New coating technology for instruments with **safe** and **biocompatible medical-grade** metal nanoparticles, which, combined with **laser-quenching** and **heat activation** of Nickel-Titanium, allows for an instrument with **perfect cutting efficiency and flexibility and increased wear resistance**.

## WHAT ARE THE ADVANTAGES OF NANO COATED?

**MORE RESISTANCE** - Up to 10 times higher ●

**BIOCOMPATIBLE** ●

**MORE HARDNESS** - Up to 168% higher ●

**ANTI-CORROSION** ●

**PERFECT CUTTING CAPACITY** ●

**GREATER ANTI-SPLITTING PROTECTION** ●
